# *Mobile UI Kit Assignment*

For this assignment you will be designing a variety of visual design components for a mobile application of your choice. Consider the buttons and icons you interact with on a daily basis and try to carry on a consistent theme throughout. This is a very important and crucial step as it will pave the way for a successful UI design for a Mobile device. *Follow these criteria steps below to meet the project expectations:*

1. **Rough Draft:** You will draft out a few ideas on paper or digital screen to create your basic approach to the UI kit (Grayscale etc).

2. **Good Draft:** Based on your rough draft you will then create a Full rendered design which captures the colour elements and interactive behavior states of your entire UI kit.

Out of possible 10% of your overall mark - Good Luck and Have Fun!
